

ABSTRACT OF THE DISCLOSURE

Gaming furniture (10) comprises a support structure (12), and an erectable and collapsible support platform arrangement (16). The support structure (12) defines a space (22) in which one or more video-game controllers (62) and/or a corresponding video-game console can be received, and the support platform arrangement (16) supports the or each video-game controller (62). In a first condition, the support platform arrangement (16) is collapsed and received in the said space (22) of the support structure (12) for storage. In a second condition, the support platform arrangement (16) is erected and projects beyond the perimeter of the support structure (12) for gaming.
